

How can you innovate for achieving climate resilience in your jurisdiction?

Participants (executive-level & mid-level)

- ◇ Insurance supervisors & regulators
- ◇ Insurance associations
- ◇ Industry representatives
- ◇ Policymakers
- ◇ Tech representatives
- ◇ Environmental organisations
- ◇ Consumer representatives
- ◇ Other important stakeholders

Methodology

- ◇ Start dialogue, build networks
- ◇ Analyse country systems
- ◇ Benefit from peer knowledge exchange and cooperation
- ◇ Receive support from experienced change facilitators
- ◇ Prototype innovative solutions
- ◇ Disrupt your insurance market

3 – 4 country teams

- ◇ 12-month process of continuous exchange, learning and innovating
- ◇ 3 national workshops (virtual & in-person)
- ◇ 3 international workshops (virtual & in-person)

Change the paradigm.

“The lab has been instrumental in creating a mind shift in how stakeholders can work together through collaboration across industries and different players in an economy to greater positive change. This collaboration helps in understanding what solutions need to be created not only from an individual perspective but a global perspective for sustainability.”

iii-lab 3 participant

“We, the regulators normally listen but we are not the ones building something together; I have never been in an activity like this before; the impact is different.”

iii-lab 3 participant

Applications from insurance supervisory authorities are now open.
Deadline for applications: **17 September 2023**
